Course Tools

Verify the required course extensions without exposing credentials.

Required extensions

Install the individual Java language and debugger extensions; the Java extension pack is not required. GitLens only needs to be installed, with no GitKraken or GitLens account or sign-in.

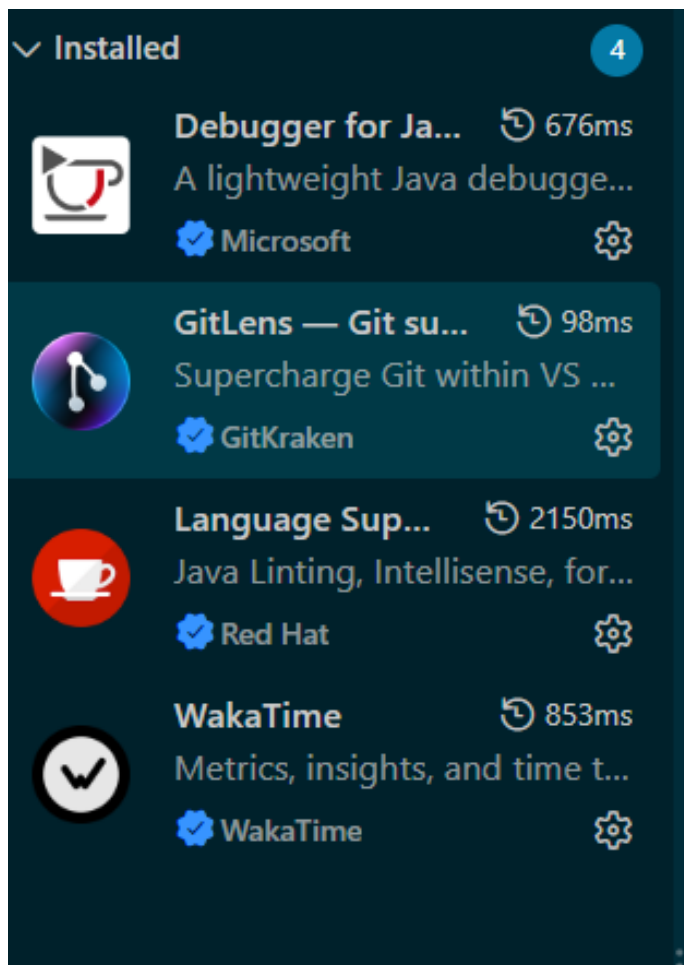

Image evidence prompt

Upload one readable screenshot of the active IT114 VS Code profile's Extensions view.

Requirements and potential deductions

- The active profile shows Language Support for Java(TM) by Red Hat as installed. (up to -0.55 points)
- The active profile shows Debugger for Java by Microsoft as installed. (up to -0.55 points)
- The active profile shows GitLens as installed; no account is required. (up to -0.55 points)
- The active profile shows WakaTime as installed. (up to -0.4 points)

Caption: An image of my VS Code extensions

Java Environment

Prove the configured toolchain and the program's observable behavior.

JDK toolchain

From your repository terminal, check the installed JDK:

- `java --version`
- `javac --version`

Image evidence prompt

Upload one readable terminal screenshot showing both JDK version results.

Requirements and potential deductions

- `java --version` reports JDK 26 or later. (up to -0.7 points)
- `javac --version` reports the same JDK major version as `java`. (up to -0.7 points)

Caption: An iamge of my terminal showcasing java version

```
• $ java --version
java 27 2026-09-15
Java(TM) SE Runtime Environment (build 27+35-2325)
Java HotSpot(TM) 64-Bit Server VM (build 27+35-2325, mixed mode, sharing)

AntAl@MobileComCenter MINGW64 ~/aia47-IT114-001-f2026 (Module01-Getting-Starte
• $ javac --version
javac 27
```

MyHello output

From the repository root, compile and run your new `MyHello.java` file:

- `javac MyHello.java`
- `java MyHello`

Image evidence prompt

Upload one readable terminal screenshot showing successful compilation and at least one readable output line from `java MyHello`.

Requirements and potential deductions

- `MyHello.java` compiles without an error. (up to -0.7 points)
- `java MyHello` prints at least one nonempty line of output. (up to -1.35 points)

Caption: Displayed Results from Terminal

```
AntAl@MobileComCenter MINGW64 ~/aia47-IT114-001-f2026 (Module01-Getting-Started)
• $ javac MyHello.java

AntAl@MobileComCenter MINGW64 ~/aia47-IT114-001-f2026 (Module01-Getting-Started)
• $ java MyHello
Hello IT114
```

Generated class ignore rule

Image evidence prompt

After compiling `MyHello.java`, upload one readable terminal screenshot showing the result of `git status --ignored` from the repository root.

Requirements and potential deductions

- `git status --ignored` lists `MyHello.class` under Ignored files rather than Untracked files. (up to -0.7 points)

Caption: Displays Ignored Files

```
• $ git status --ignored
On branch Module01-Getting-Started
Ignored files:
  (use "git add -f <file>..." to include in what will be committed)
    Hello.class
    MyHello.class

nothing to commit, working tree clean
```

Personal Repository

Verify repository access and provide the exact source file.

Repository collaborators

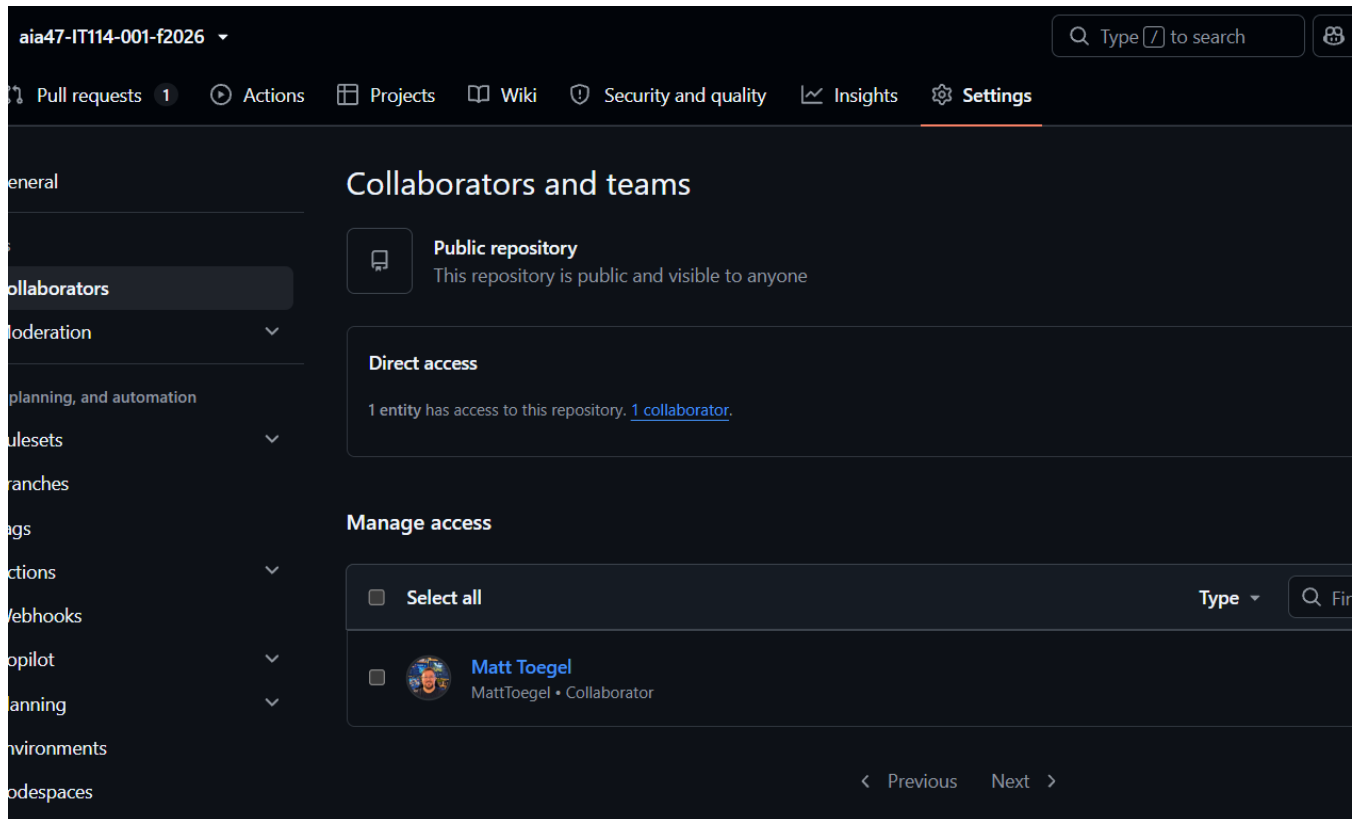

Image evidence prompt

Upload one readable screenshot of GitHub's collaborators view that clearly shows the repository name and collaborator list.

Requirements and potential deductions

- The repository name is ``<ucid>-IT114-<section>-<semYear>`'. (up to -0.55 points)
- The collaborator list shows ``MattToegel`` plus any announced TA. (up to -0.85 points)

Caption: Collaborators

MyHello source

URL prompt

Submit the GitHub file URL for ``MyHello.java`` on ``Module01-Getting-Started``.

Requirements and potential deductions

- The URL opens ``MyHello.java`` on ``Module01-Getting-Started`'. (up to -0.7 points)
- The linked source prints a short message chosen by the student. (up to -0.7 points)

<https://github.com/aia47-cyber/aia47-IT114-001-f2026/blob/Module01-Getting-Started/MyHello.java>

Reflection

This section is worth one point total: submit your pull-request URL and separate WakaTime project/file evidence, then answer the three reflection questions.

Assignment pull request

URL prompt

Submit the direct GitHub pull-request URL from `Module01-Getting-Started` into `main`.

Requirements and potential deductions

- The pull request source is `Module01-Getting-Started`. (up to -0.1 points)
- The pull request target is `main`. (up to -0.1 points)

<https://github.com/aia47-cyber/aia47-IT114-001-f2026/pull/2>

WakaTime project overview

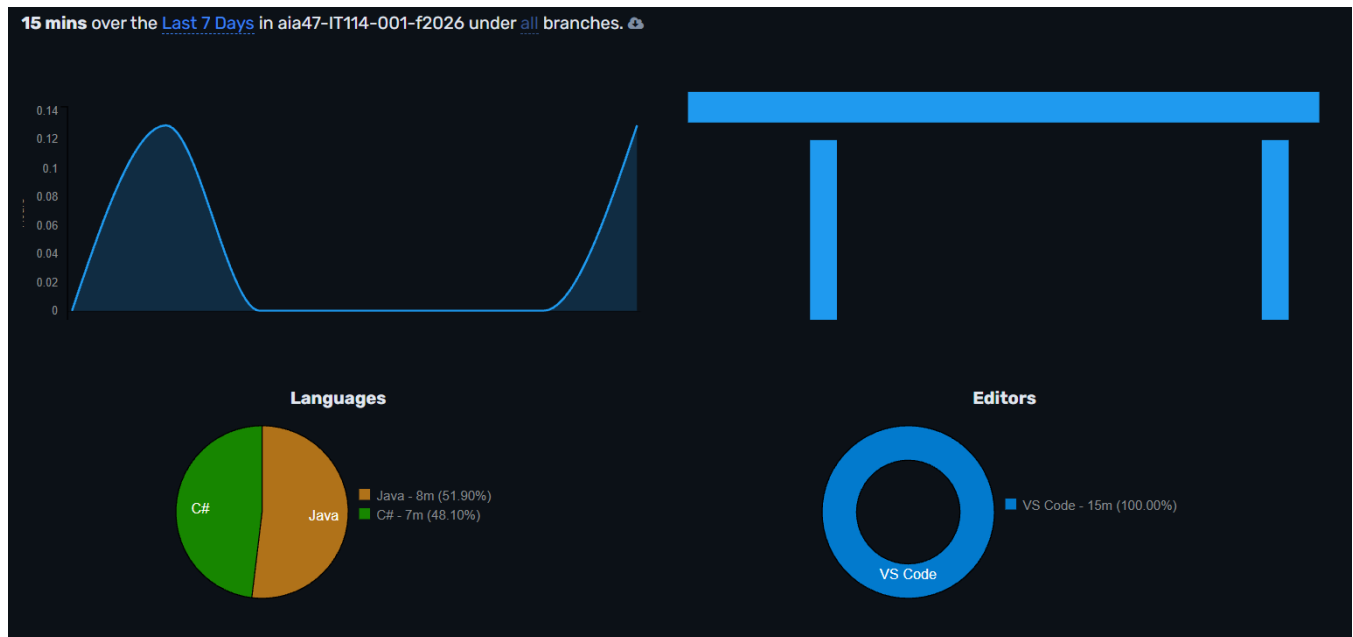

Image evidence prompt

In WakaTime, open **Projects**, select your student IT114 repository, and upload one readable screenshot of its overview.

Requirements and potential deductions

- The personal IT114 repository is visible. (up to -0.05 points)
- Recorded time is greater than zero. (up to -0.05 points)

Caption: First half of Wakatime

WakaTime assignment activity

Image evidence prompt

In WakaTime, open **Projects**, select your student IT114 repository, and upload one readable screenshot showing relevant file and branch activity.

Requirements and potential deductions

- Relevant assignment files are visible. (up to -0.05 points)
- The assignment branch is visible or identified in the caption. (up to -0.05 points)

Caption: Second Half of Wakatime

Files		Branches	
7 mins	Hello.java	10 mins	main
4 mins	CameraController.cs	4 mins	Unknown
2 mins	...ct/Assets/Scripts/PlayerController.cs	33 secs	Module01-Getting-Started
33 secs	MyHello.java		

Learned or verified

Response prompt

What did you learn or verify while completing this assignment?

Requirements and potential deductions

- The response identifies something the student learned or verified. (up to -0.2 points)

Submitted response

A more thorough usage and understanding of git commands and other extensions.

Easiest part

Response prompt

What was the easiest or most straightforward part of this assignment, and why?

Requirements and potential deductions

- The response identifies the easiest or most straightforward part. (up to -0.1 points)
- The response explains why that part was straightforward. (up to -0.1 points)

Submitted response

Making the java file and coding were the easiest by far.

Most difficult or uncertain part

Response prompt

What was the most difficult part of this assignment, or what remains uncertain or still needs work?

Requirements and potential deductions

- The response identifies a difficulty, uncertainty, or remaining next step. (up to -0.2 points)

Submitted response

The most difficult was the git checkout command mainly due to the folder name being very specific.
